User Experience Designer

Over 3 years of experience in Product (UI/UX), Web, and Visual Design. During an honest entrepreneurial attempt, I gained 0-to-1 expertise in product design and development in healthcare, gamification, D2C e-commerce, real estate, and non-profit. I enjoy working in close collaboration with teams across technology, business and design.

Currently, I'm learning the world of news media, reporting, and stock markets research. I'm excited to actively participate in product building; working on scalable products that reach the masses and create positive lasting impact.

Experience

Product Designer • Times Internet Limited

Feb 2023 - Present

- Currently serving as a UI/UX Designer, focusing on delivering high-impact visual designs and user experiences
- Active contributor to Subscriber Revenue pod for Economic Times and Times of India
